And I... I just... I can't
get you out of my mind.

Ever since that... That day in
that restaurant when we met.

Do you, uh... have
a ketchup secret?

Russell, you are
the president of NBC.

Ever since that... That day in
that restaurant when we met.

Do you, uh... have
a ketchup secret?

General Trivia

George throwing the Tic Tacs on the bed for Estelle (Estelle Harris) to eat so she would stop complaining was completely improvised by Jason Alexander.

Goof

Jerry Seinfeld claimed the of the song "The Wheels recording the episode.

Key Components

Speech to Text

Using Microsoft Azure
speech to text API

Global Search

Search for substring
within subtitle file
dataset

Subtitle Aligner

Forced alignment
between audio and
subtitle file

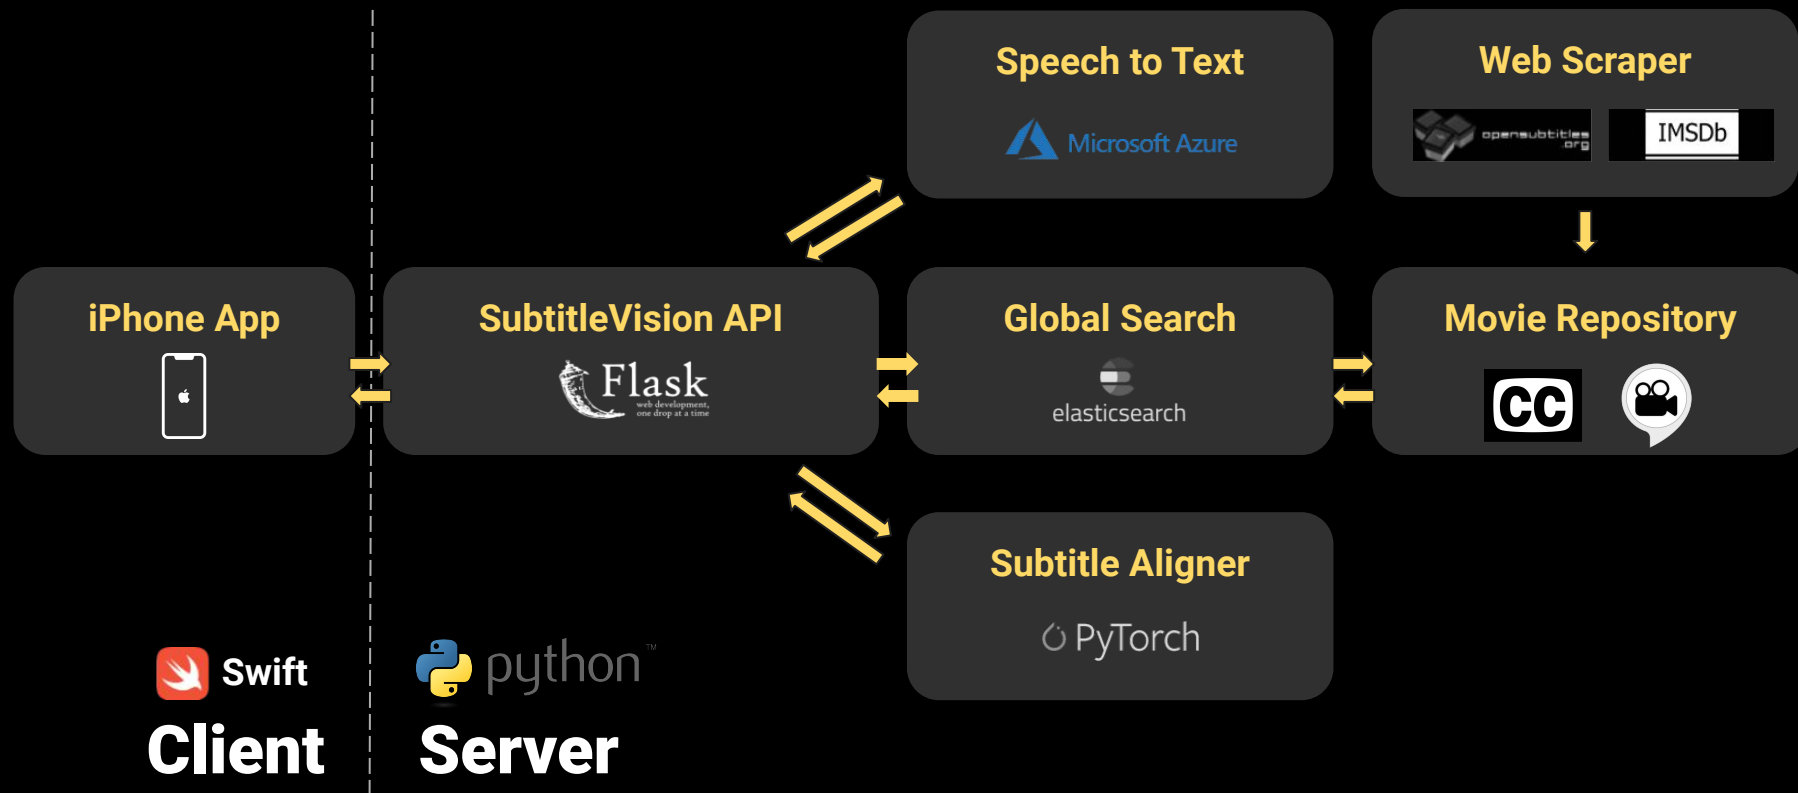

iOS App

Front end user
interface for displaying
the information

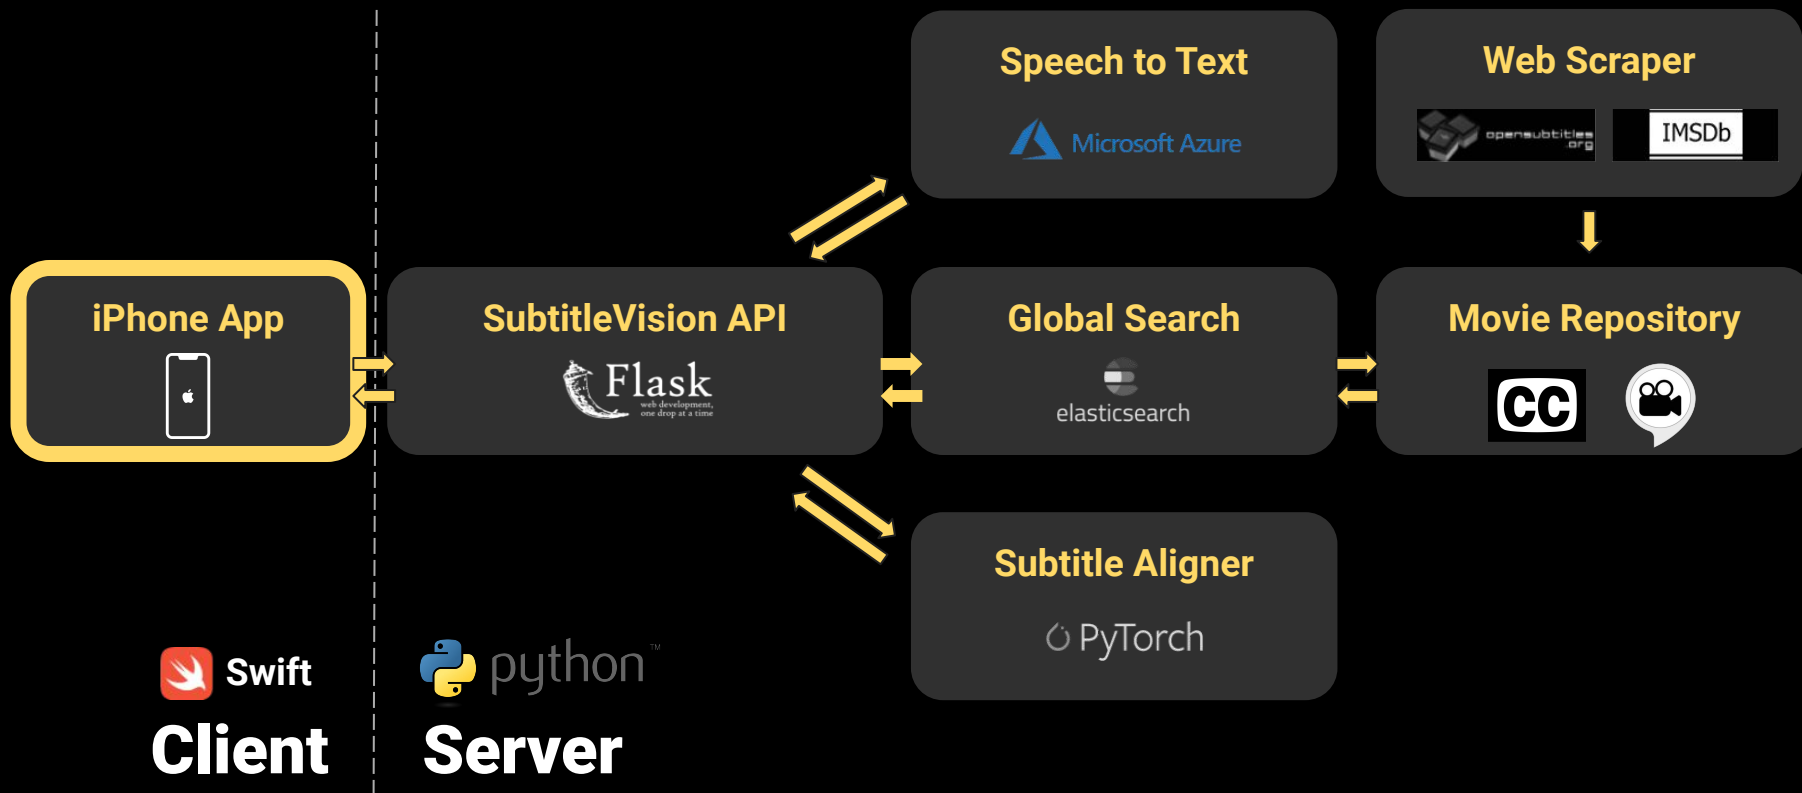

Movie Data Repository

Scrape and organize
movie data

System Architecture

System Architecture

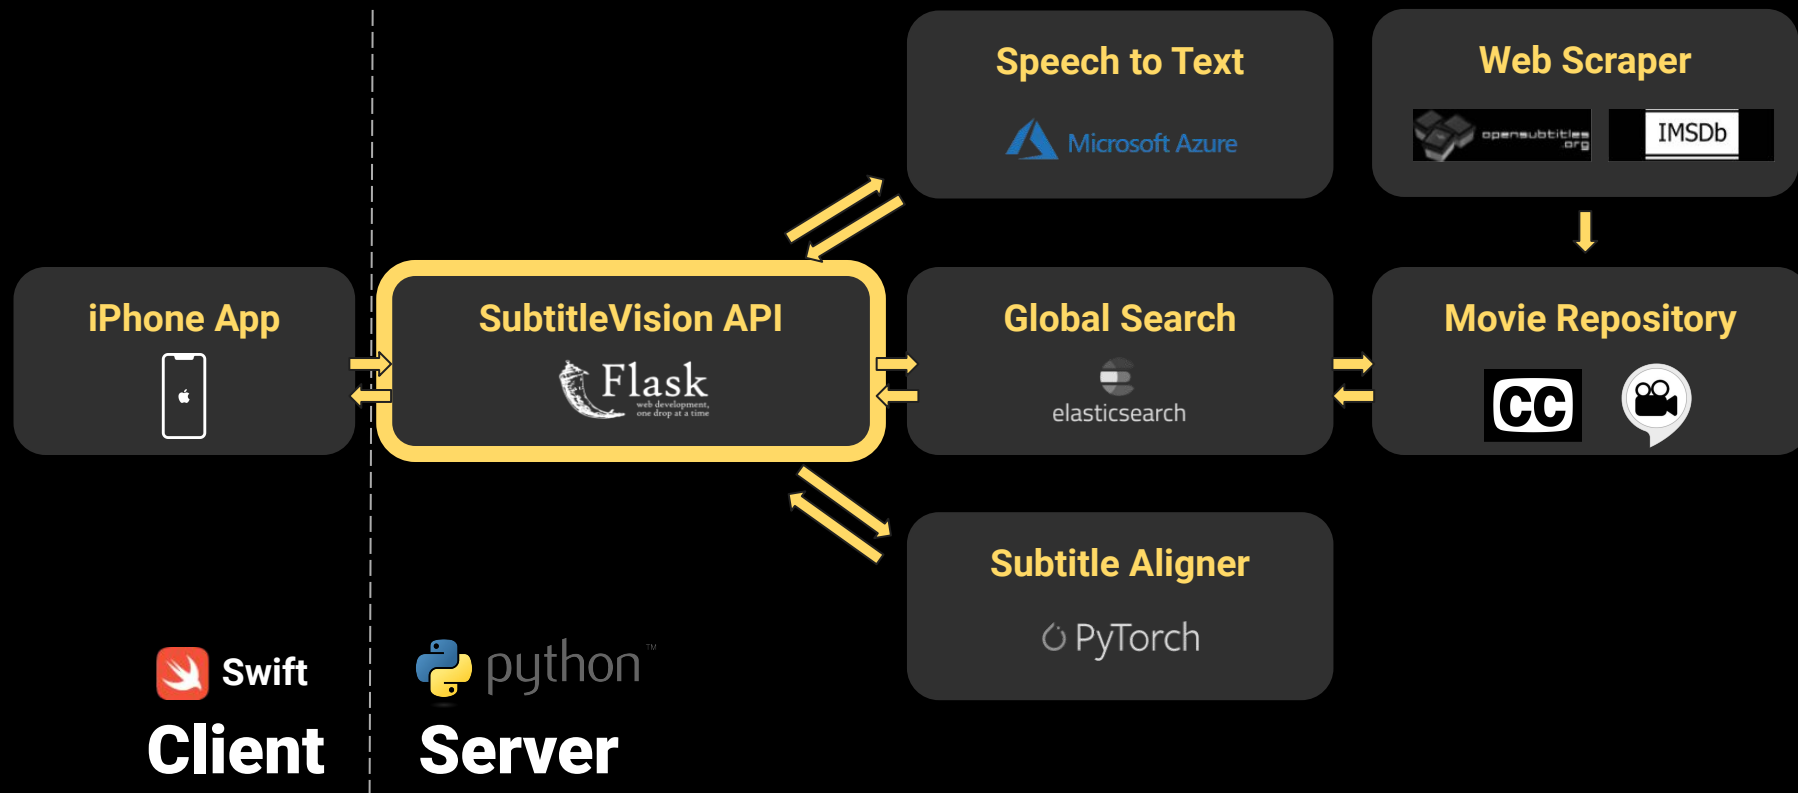

Step 1: iOS App

Goal: A display that is convenient and intuitive for the Movies, TV Shows, and subtitles, synced using audio recording

System Architecture

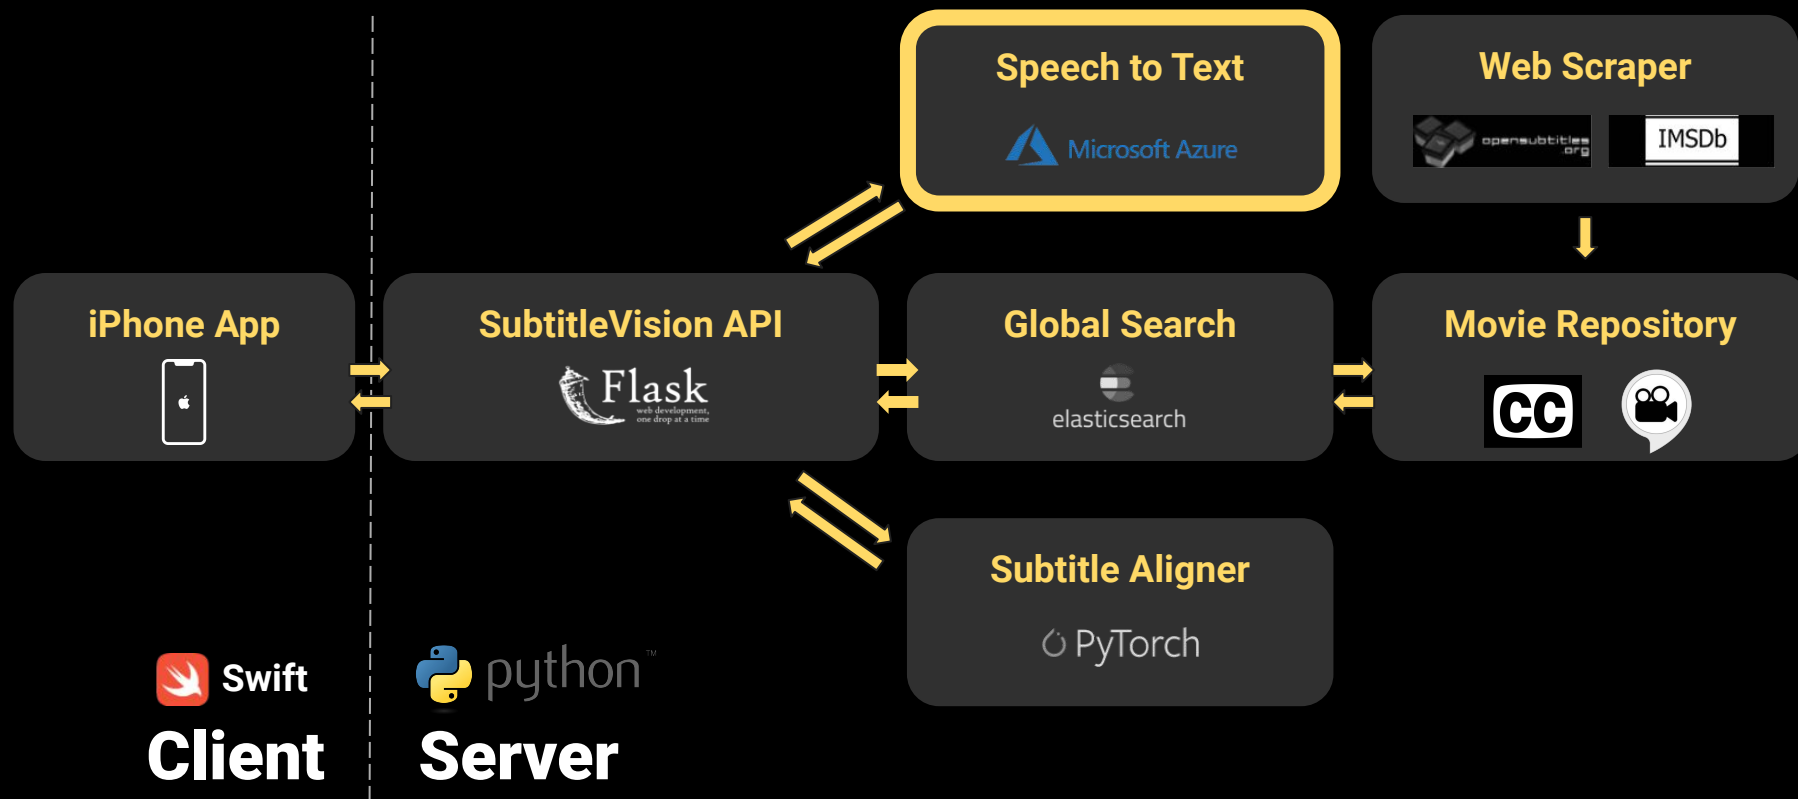

Step 2: Flask RESTful API

Inputs: HTTP requests from the iOS app (Audio Recording Files)

Goal: Process audio and provide necessary JSON information back to the app

1. Call speech to text service to produce transcript
2. Call global search to Identify the movie and rough playback time
3. Call subtitle aligner to retrieve exact synchronization information
4. Retrieve metadata from subtitle repository

System Architecture

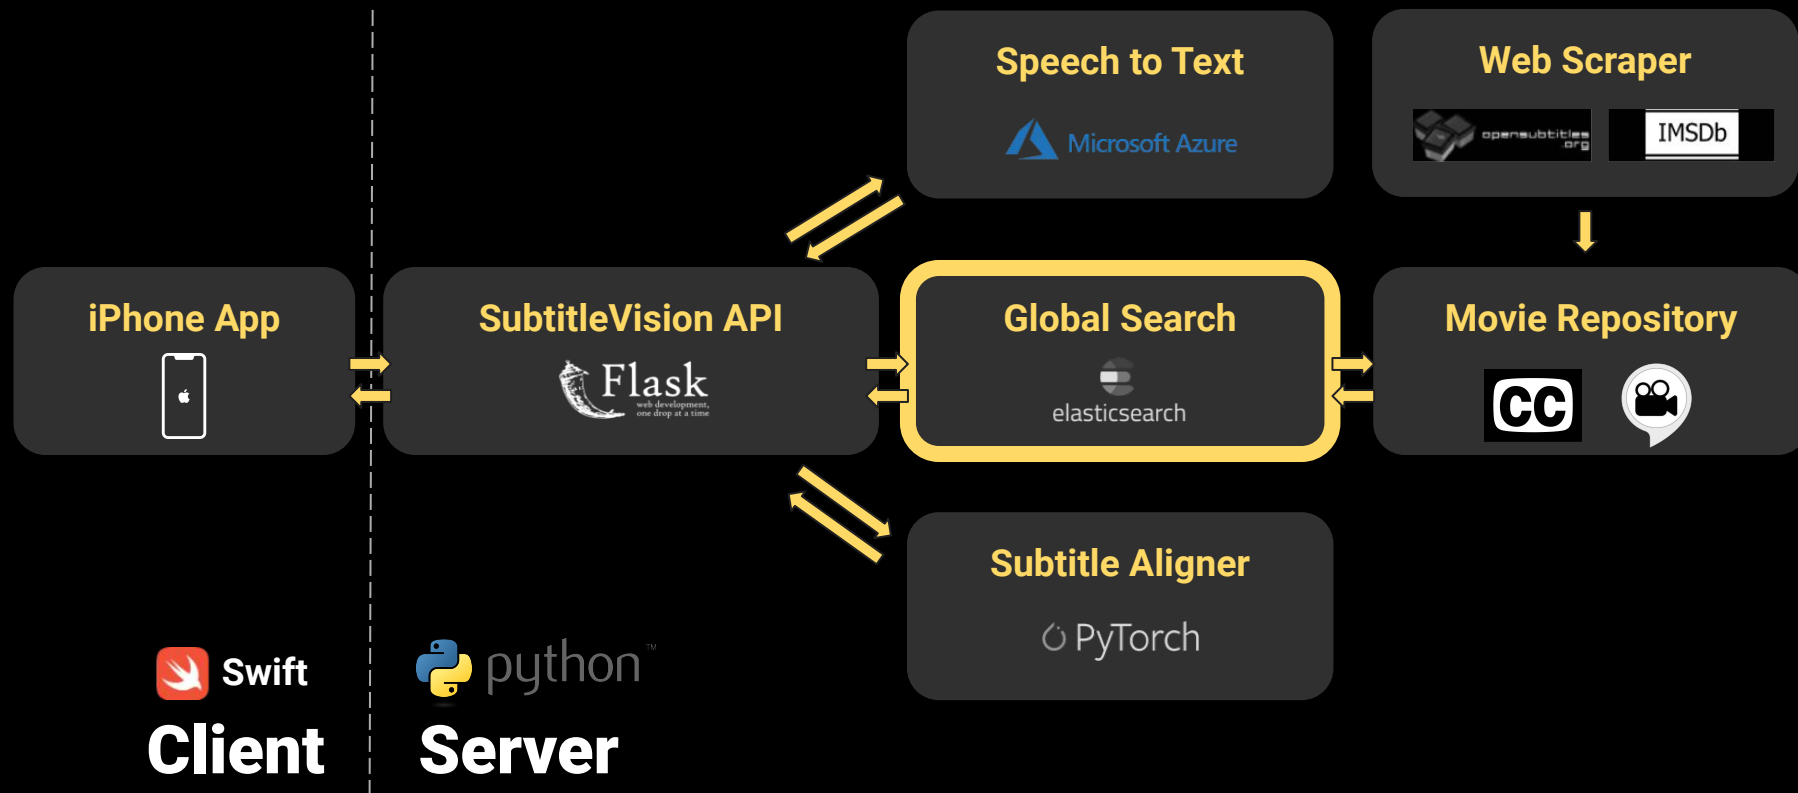

Step 3: Speech To Text

Input: Phone's microphone recording rolling audio sample

Goal: Reliably transcribe the audio sample to usable text

System Architecture

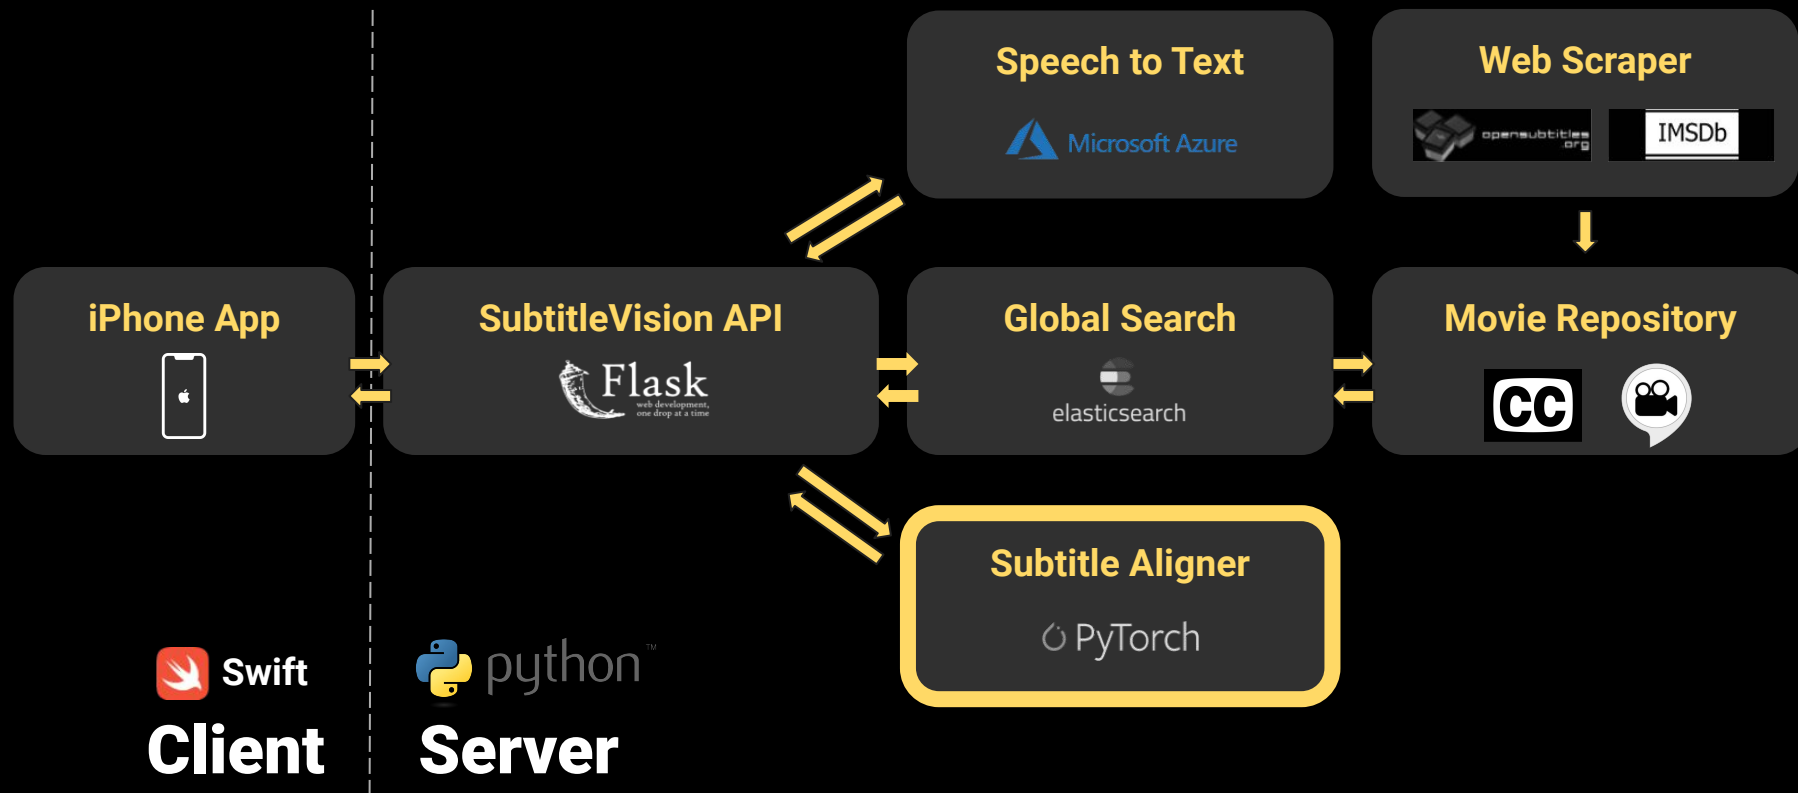

Step 4: Global Search

Inputs: Transcription of audio recording

Goal: Determine the playing movie or TV show and find what line in the Movie correlates with the transcription

System Architecture

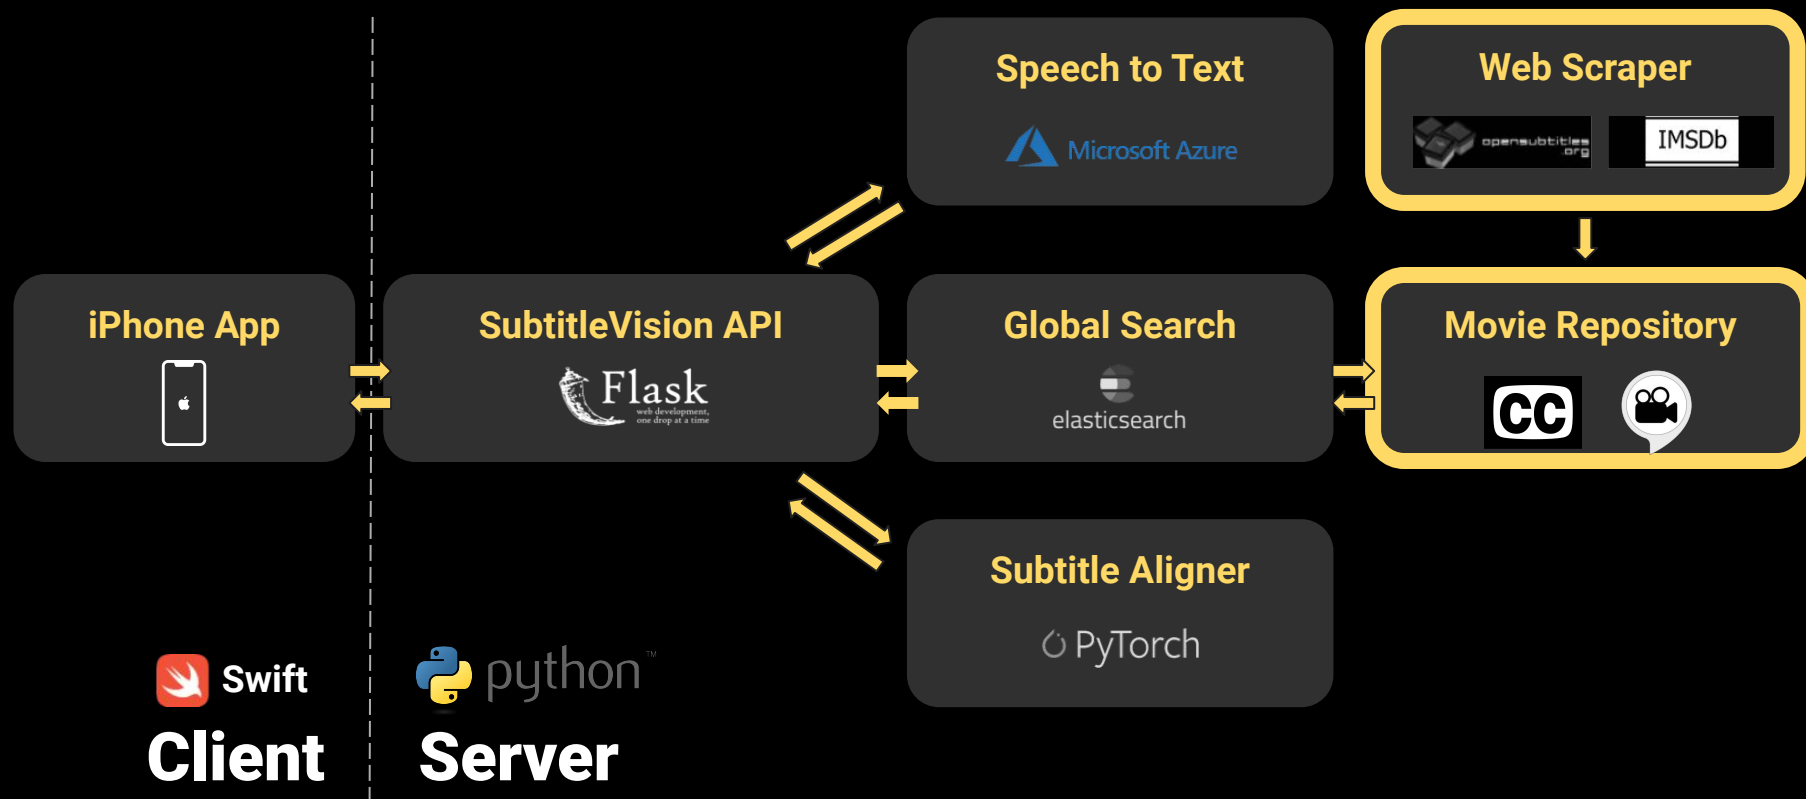

Step 5: Subtitle Synchronization

Input: Speech Sample and 3-5 lines of subtitles

Goal: Match a time in the speech sample with an exact playback time in subtitle file

System Architecture

Movie Data Repository

Goal: Build repository of subtitles
files and movie information, perform
pre-processing

Over 300 movies, catalogued
and preprocessed
